  - Max. length of linen to be stacked is 950 mm (37,4'') (draping point in centre).
  - Max. lane width: 1000 mm (39,4'')

## Application

The Jenstack Drape & Store is a free-standing stacker for precise stacking of napkins, pillow cases, towels and other small pieces of linen that are preferred not to be folded.

## 1 Operation

The Drape & Store stacker receives flat pieces directly from the ironer and conveys them in continuous, parallel lanes to a ferriswheel type device comprising lateral draping bars. Each piece of linen is held firmly against one side of the stacking bar while the trailing edge of the piece is guided across the opposite side of the stacking bar, and thus folded. Each lane comprises 11 stores, of which three can be full at the same time. When three stores are full in one lane, the operator is alerted to remove the stacks, so only one operator is required behind the stacker.

## 2 Bypass system

A bypass system comprising bypass conveyor and divided bypass table is available as an option.

## Installation

JENSEN is pleased to assist you in planning your laundry providing excellent consulting, layouts and technical data. Authorized JENSEN distributors or JENSEN engineers should carry out the installation to ensure the correct performance.

## Service

In addition JENSEN provides an extraordinary after sales service through a worldwide network of highly qualified Sales and Service Centers and distributors, all with their own maintenance and spare parts services.

## Call us...

JENSEN provides a complete range of heavy-duty equipment for the laundry industry, delivered and installed according to your specifications. Please do not hesitate to contact us for further advice and information, or visit
