

## JENSEN Gamma Napkin Folder

Perfect Folds, Peak Efficiency

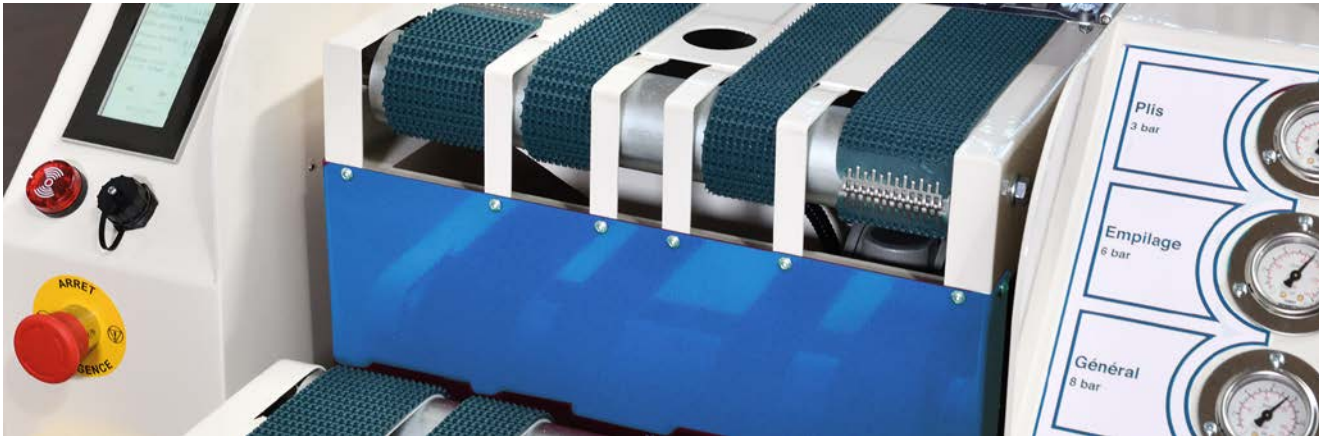

Pressure control gauges measure and monitor fluid or gas pressure for optimal system performance.

### **Exceptional folding quality and productivity**

JENSEN Gamma is designed to fold flatwork items such as napkins, pillowcases, hand towels, bidet towels, and essentially any linens processed by the ironing line. This high-performance napkin folding machine delivers exceptional folding quality and productivity. JENSEN Gamma can handle various formats, that can be stored in the work programs, allowing operators to easily select the most suitable one using the touchscreen panel.

### **Efficiency and Versatility**

JENSEN Gamma can be positioned at the ironing line's outlet, downstream of another folding machine, or can even operate independently with manual feeding. One distinctive feature of this machine is the inclusion of two folding stages that utilize mechanical blades on a vacuum table. The primary folds are executed in the first stage, while the cross folds occur in the second stage. This technical solution offers several advantages, including straightforward format changes, high hourly output, visual monitoring of all folding steps, and easy maintenance. All folding modes, format sizes, and machine settings can be selected through the available programs.

Easy configuration of folding programs via the touchscreen panel (also remotely as an option)

### Standard features

- Designed for folding small and medium-sized garments.
- Various working widths available (600, 700, 800, 1000, 1100, 1200)
- Versatility in usage: manual or integrated introduction into the ironing line.
- The Variable Folding Table allows for adjusting the width of the initial longitudinal folds.
- Excellent adherence to the folding plane thanks to the suction system along the longitudinal guides.
- Precise stacking thanks to the shovel turning system.
- High hourly output (up to 2000 items/h)
- Configuration of folding programs via the touchscreen panel (even remotely).
- Capacity to program up to 50 different folding formats.

### Options

- Runner module (available from model 700 on)
- Return belt of the piles to the operator
- MES signals
- Jaws 3° and 4°-fold
- Control panel (series HME07, screen 7") at the ironer to change programs and manage alarms. The panel is provided with Ethernet LAN10/100 connection for production data processing and remote service management in line with Industry 4.0 directive.
- Special color
- Special bridge on multiple machines (price per machine)
- 3 phases + GN 400V 50 Hz., 16 ampère
- 3 phases + GN 400V 60 Hz., 16 ampère
- Rails (for one machine)
- Scarto 3300, 3-5 lanes
- Scarto 3500, 3-5 lanes
- Scarto 4000, 3-6 lanes
- Scarto 4200, 3-6 lanes
- Gangway
- Special color (Scarto)

### Installation

JENSEN is pleased to assist you in planning your laundry by providing excellent advice, layouts and technical data. Authorised JENSEN distributors or JENSEN engineers should carry out the installation to ensure that it is performed correctly.

### Service

In addition, JENSEN provides an extraordinary after-sales service through a worldwide network of highly qualified Sales and Service Centres and distributors, all with their own maintenance and spare parts services.

### Call us...

JENSEN provides a complete range of heavy-duty equipment for the laundry industry, delivered and installed according to your specifications. Please do not hesitate to contact us for further advice and information, or visit [www.jensen-group.com](http://www.jensen-group.com)
